

Bank Transfer Daily Limit Feature

Feature Name

Daily Transfer Limit Validation

Background

To improve transaction security, users should not be able to transfer funds exceeding their daily transfer limit.

Currently, the mobile banking application validates only the balance amount and does not validate accumulated daily transfers.

Objective

Prevent users from transferring amounts that exceed the configured daily transfer limit.

User Story

As a banking customer, I want the system to reject transfers exceeding my daily limit so that my account remains secure.

Scope

This feature applies to:

- Internal bank transfer
- Interbank transfer

This feature does not apply to:

- Scheduled transfers
- Credit card payments

Functional Requirements

FR-1 Daily Limit Validation

The system shall validate total successful transfer amount made by the user within the same calendar day.

FR-2 Limit Amount

Default daily transfer limit:

- Regular account: IDR 25,000,000
- Premium account: IDR 100,000,000

FR-3 Validation Message

If transfer exceeds the limit, show error message:

"Transfer failed. Daily transfer limit exceeded."

FR-4 Reset Mechanism

Daily transfer usage resets at 00:00 local server time.

FR-5 Failed Transactions

Failed transactions must not count toward daily transfer usage.

Non-Functional Requirements

NFR-1 Performance

Validation response time should be under 2 seconds.

NFR-2 Security

Transfer validation must be executed server-side.

Assumptions

- User is already authenticated.
- Core banking service is available.

Dependencies

- Transfer service API
- Customer profile API

Acceptance Criteria

AC-1

Given user has transferred IDR 24,000,000 today
When user transfers IDR 2,000,000
Then transaction is rejected

AC-2

Given user has transferred IDR 20,000,000 today
When user transfers IDR 5,000,000
Then transaction is successful

AC-3

Given failed transfer transaction
When checking daily usage
Then failed amount is excluded
